

# 3

## Security Tips for Data Analyst while using AI Assistants

# 01

## Use Data Subsets

Carefully evaluate and share only the minimum necessary data required for the specific analysis.

# 02

## Remove PII

Remove personally identifiable information (PII) from datasets before sharing.

# 03

## Utilize Data Tokenization

It replaces sensitive data with random tokens, securing original data.

**Change human cyber  
security behavior with**

**security<sup>®</sup>  
quotient.**
